## Beskrivelse

HMF HLK model, 6.40 m drop-side body with split side panels

Internal dimensions: L 6400 x H 900 x W 2440 mm – total external length approx. 6700 mm

Full-length drop-side opening on the left; aluminium side panels on the right (have not been opened for several years)

300 mm air-operated automatic tailgate – capacity approx. 16 m³

Top-hinged aluminium tailgate mounted at the front end of the body

Floor is worn, with some small holes starting to form, but otherwise intact – includes a central roller

NOTE: The drop-side has been function-tested; the hydraulic cylinder rods appear to be in good condition. The automatic tailgate requires inspection and potentially a new air cylinder due to rust on the piston rod.
